## Relevant Experience

### Software Engineering Immersive

03/2019 – 06/2019

General Assembly, Washington, DC

Completed a 12-week, 480 hour immersive course applying full-stack software engineering skills to group and individual projects including:

- Developed an interactive memory game using JavaScript, HTML, and CSS.
- Built and deployed a JSON API, with RESTful routes and CRUD functionality allowing users to traverse data about every country around the globe including the national flag, currency, languages and population statistics.
- Developed a full-stack app in collaboration with a team using GitHub and Slack. Technologies included MongoDB, Mongoose, Express, React, CSS, and Node. Responsibilities included creating components and routes on the front-end, developing wireframes, CSS styling, and deploying the application with Heroku.
- Created an app that allows users to identify and save favorite inspirational quotes. Built a custom API and using React, MongoDB, Express, and Node. Next step is incorporating responsive web principles.
- Designed a full-stack e-commerce website built

## Relevant Experience

with MongoDB, Express, Node, and Embedded JavaScript with mapping through MapBox and image uploading functionality through Cloudinary.

### Software Trainer

06/2013 – 10/2013

ScribesSTAT, Bellingham, WA

- Completed intensive training and developed software knowledge.
- Coached medical professionals using electronic health records (EHR) on the floor.
